## Professional Summary

With my past jobs, those focused on high quality manufacturing, logistics and team based environments.

I am pivoting my career towards Tech based skills that allow for future growth within the Tech Industry.

I have always loved web development and creating things. Recently been focusing on brushing up my front end web development skills along with Javascript.

I am self taught and have the initiative to learn through hands on projects, that have real world application.

I deploy my projects through the command line within the terminal to GitHub.

Currently taking the interest into learning backend development as well to have the skills to be a full stack developer.

I must admit I have a long way to go into becoming a full stack developer and I am willing to push myself to achieve those goals.

## Technical Skills

- HTML5, CSS3, JavaScript (ES6+)

- React (components, props, state, basic hooks)

- Vite, npm

- Git & GitHub (forking, branching, deploying)

- Responsive design & basic UI/UX principles

- Debugging, troubleshooting, and learning from documentation

# Projects - see live at [https://chrisahearn.dev](https://chrisahearn.dev)

### RoboFriends - Using React/Javascript

- 
  Robofriends was one of my first projects exploring React, created to help me understand how modern front-end frameworks work in a real, hands-on way.

  The project involved building a simple interactive web application where users can search through a list of robot "profiles," with the interface dynamically updating as they type.

  Through Robofriends, I learned the fundamentals of React components, props, state management, and rendering lists, as well as working with external data and styling libraries.

  This project helped me move beyond theory and start thinking like a React developer, gaining confidence in structuring applications and understanding how React handles user interaction and UI updates.

### Quote Generator - Javascript

- A quote generator that uses javascript to generate new and inspirational quotes. Javascript in this project also allows you to submit the quote to your x account and also the ability to keep looking at new quotes. These quotes are api generated.

### Infinity Scroll - Javascript

- This Infinity Scroll project creates functionality like that of Instagram.

  When the user scrolls down it generates more information giving a never ending effect, hence the name Infinity Scroll.

  This Project was built using unsplash's API and as a demo only handles 50 requests, so just keep that in mind when viewing. This project mainly uses Javascript.

# Employment History

### Warehouse Team Member (Tugger Operator)

**Range Workforce Solutions – Petstock Distribution Centre (Avalon)** Full-time
**Aug 2025 – Dec 2025** │ On-site

Operated tuggers and warehouse equipment to transport pallets safely and efficiently.Picked, packed, and processed orders for retail Petstock stores with high accuracy and time sensitivity. Maintained organized stock and storage areas to optimize workflow and efficiency. Collaborated alongside team members to meet daily productivity targets and shipping deadlines. Developed skills in logistics, inventory management, and workplace safety procedures.

### Production / Manufacturing Team Member

**Carbon Revolution** Full-time

**Feb 2024 – Jul 2025** │ On-site

Assisted in the manufacture of high-performance carbon fiber wheels for premium automotive brands including Ferrari, Lamborghini, Corvette, and Ford. Assembled wheels and worked on the Paintline, ensuring products met strict quality and measurement standards. Interpreted production data and measurements to identify and resolve dimensional discrepancies. Maintained cleanliness and contamination control on the Paintline to ensure perfect finishes. Performed Paintline maintenance and production data entry to support smooth workflow. Developed strong problem solving skills, precision, and attention to detail in a high quality manufacturing environment.

### Production / Manufacturing Team Member

**Range Workforce Solutions – Carbon Revolution**Full-time

**Jun 2023 – Feb 2024** │ On-site

Employed through Range Workforce Solutions as a full-time team member at Carbon Revolution. Supported the manufacture of carbon fiber wheels for Lamborghini, Ferrari, and General Motors. Worked cooperatively within a production team to meet quality and output requirements. Strengthened teamwork, adaptability, and issue resolution skills in a fast-paced environment.

### Hospitality & General Work Experience

**Various Employers** │ 2017 – 2023
